

Bear Aware Colouring Sheet

Colour in the picture and in the blank space draw something a bear might eat
is it **GOOD** or **BAD** for the bear to eat (circle one)?

Ways to Live Safely Around Bears:

1. Always give any bear, big or small, plenty of space. Never approach a bear.
2. Keep garbage stored in a building or bear resistant container so that bears cannot eat it.
3. Bears love fruit trees, so pick fruit early and don't let it rot on the ground to reduce the chance of a bear visiting.
4. Remove or properly take care of any other items that a bear may be interested in. Pet food, bird feeders, compost piles and dirty barbeques can all attract bears into communities.
5. When walking or hiking in bear country keep dogs on a leash and make noise to avoid surprising a bear.

Go to **revelstokebearaware.org** to find more information about bears and how to safely coexist with them.
